# Final Restoration Tier Levels

Unlike production labs, all restorations are produced using microscopes to achieve a precise restorative fit. Restorations for each case must be ordered in the same tier level – tiers cannot be combined for one case. This ensures the same technician works on the entire case.

	EXPRESS	CLASSIC	ULTIMATE (Master Ceramist)
MONOLITHIC / LAYERED	Monolithic	Layered	Layered
MAGNIFICATION	Microscope	Microscope – increased magnification	Microscope – increased magnification
CHARACTEIZATIONS	Stain & glaze	Intrinsically layered	Intrinsically layered with meticulous attention to detail
ESTHETIC	Stain used to mimic look of natural tooth	Natural transitions & color variations, craze lines	As close to a natural tooth as possible.
CONTRAINDICATION	Dark preps; single central incisors	Single central Incisors
